## PROJECTS

### SecurePass

Developed a **web-based password manager** using **React.js**, **Express.js**, and **MongoDB**. Implemented features for generating, storing, and managing complex passwords with a focus on data privacy and security. Used **Git** for version control and **GitHub** for project collaboration.

Register : Login : Generate : Update : Delete

### E-commerce website

Developed a responsive front-end for an e-commerce website using HTML, CSS, and basic JavaScript for interactive elements, mimicking core functionalities of Amazon like:

Register : Login : Menu : Search : Product Listing and Details

### ATM Machine Simulator (Java Core Project)

This project simulates a basic Automated Teller Machine (ATM) using Java core functionalities. It allows users to perform common banking transactions like:

Login : Balance Inquiry : Withdrawal : Deposit : Exit

By using Java core concepts like Object-Oriented Programming (OOP) Principles, Input/Output (I/O) Operations, Error Handling.
